We're off to nature today and want to introduce a few more fun and educational titles from our collection of "FUN AND EDUCATIONAL" titles at A Z Press. David R Morgan is an educator and award-winning writer who has created the four delightful titles we want to present this week.

One of the talents of a great educator and writer is to present material to young readers they find engaging and don't even realize they're learning more than they ever imagined they could. This week, we're featuring *'Fabulous Frogs and Terrific Toads, Stunning Snakes are Happy Hissers, Snails and Slugs : Slimy Superstars, and Tortoises and Turtles are Tremendous'* that are fun and educational but always BE WARE of nature and always stay safe!

These delightful stories are educational and entertaining children's stories that are clever - they educate, help with reading skills and are great fun for children of all ages. Come see the stories!

FABULOUS FROGS AND TERRIFIC TOADS

BY DAVID R. MORGAN

Fabulous Frogs and Terrific Toads is a sweet and fun little book about – you guessed it – frogs and toads! Come, see how the frogs and toads add to nature around us.

Now toads and frogs
are *amphibians*, you see,

And there's more than 6000 types
that they can be!!

Both toads and frogs truly help us out,

By eating harmful insects
that buzz all about.

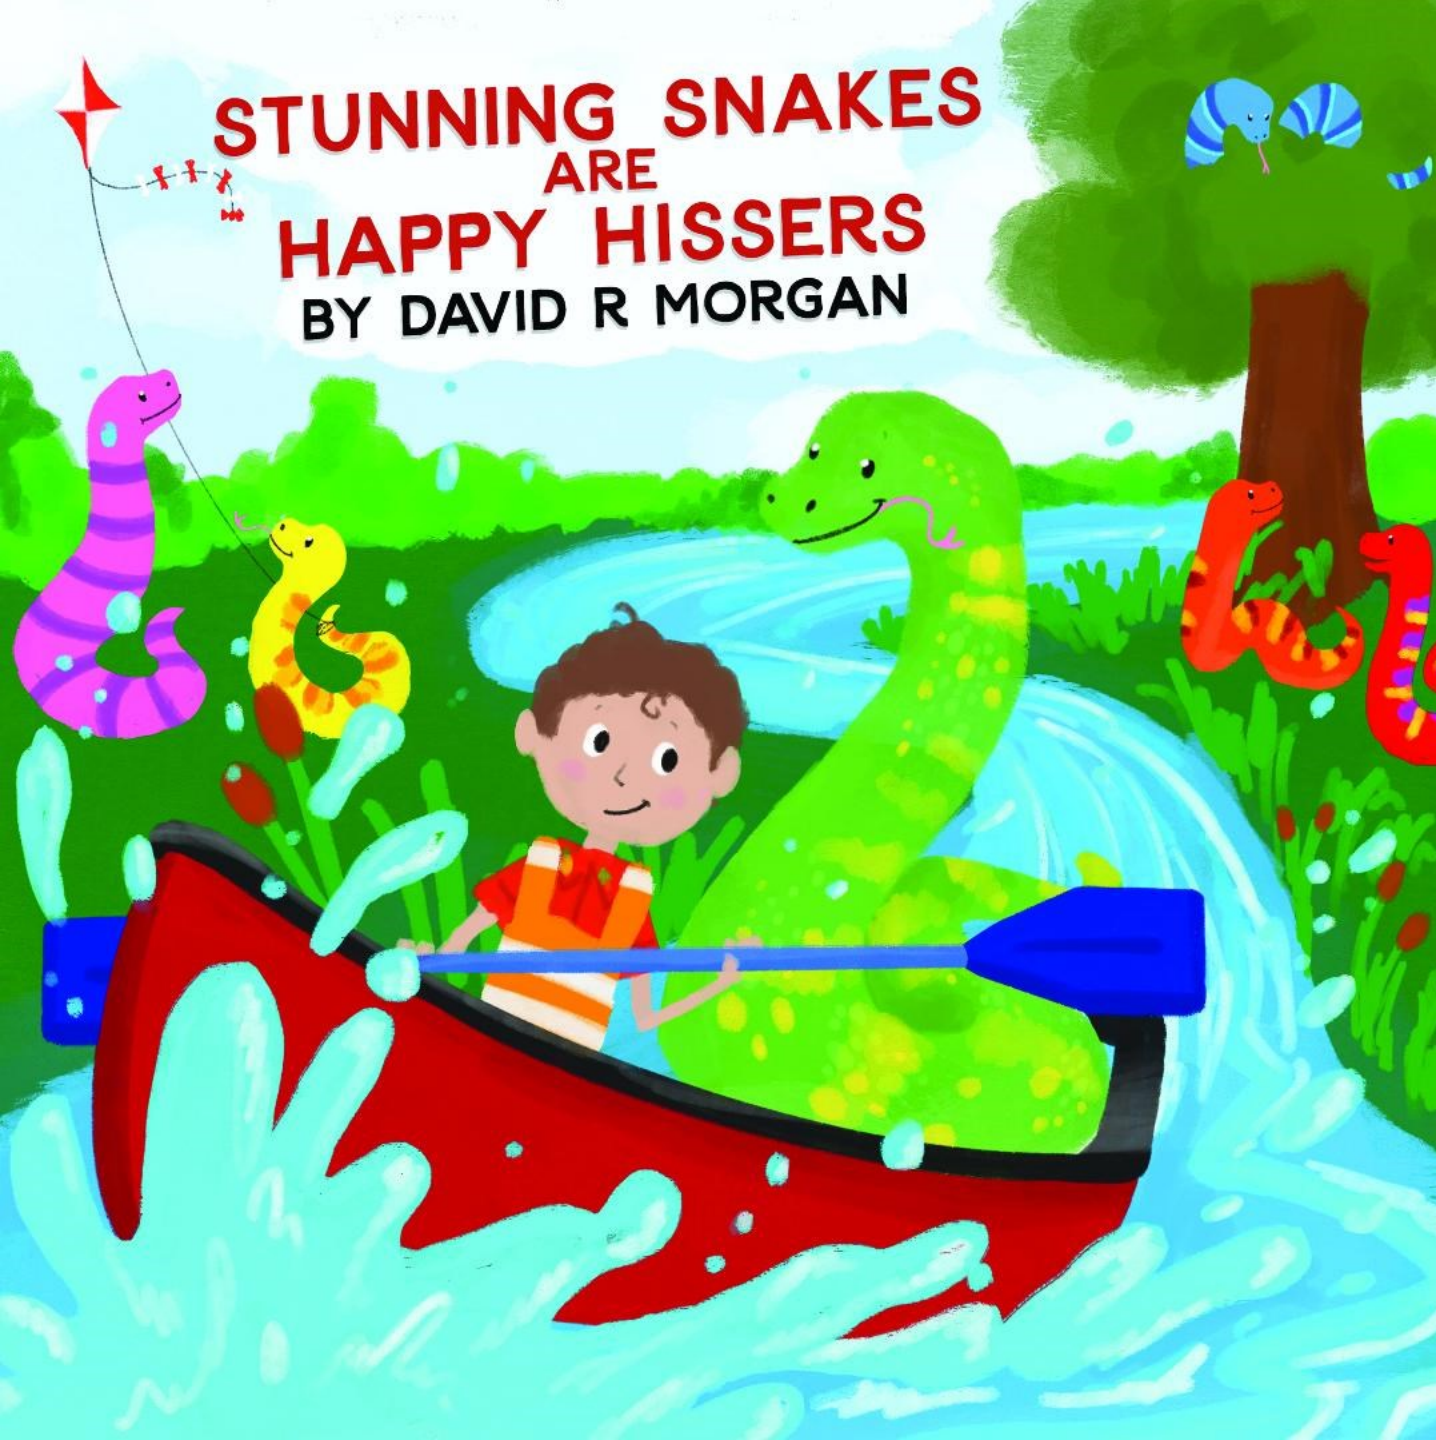

Frogs are not only cute, they are amazing. They start living completely underwater then become a critter that breathes air. They have so many fascinating qualities! A few fun facts about them include:

- A frog is an amphibian
- More than 4,700 types of frogs can be found everywhere except the Antarctica
- A frog is cold blooded (poikilothermic)
- Their size ranges from 1 cm to 30 cm in length
- Frogs are able to lay 4,000 eggs at one time
- They have webbed feet and long hind legs which are used for jumping and swimming. They can jump over 20 times their height and some even higher!

**STUNNING SNAKES
ARE
HAPPY HISSERS**
BY DAVID R MORGAN

Stunning Snakes are Happy Hissers shows the young reader how much fun and enjoyable snakes can be but we always need to be safe!

When I go on holiday,
I always take,

Sid! My favorite
happy hissing
pet snake.

A family of snakes is a Pit or a Nest,

They are incredible creatures
and certainly not pests.

Snakes - are amazing creatures that most are frightened of. Some fun facts about snakes are:

1. There are over 3000 different types of snakes
2. Snakes are in the class called reptiles and are cold blooded
3. Snakes live everywhere except where temperatures are frozen all year round
4. Snakes live in lakes, oceans, trees, rivers, forests, and even deserts
5. Snakes have scales whose major purpose it to help snakes move over hot and rough surfaces. The scales make the skin waterproof and are made of keratin like human fingernails.

SNAILS AND SLUGS SLIMY SUPERSTARS

BY DAVID R MORGAN

*Snails and Slugs are truly
Slimy Superstars and are as
educational as they can be !*

With colorful and clever pictures, the young reader is entertained and learns about snails and slugs.

Across the lawns at dawn you'll see,
Our shimmering trails - like pearly poetry.

A gastropod is something
with one large foot that
they move along on

We're Gastropods and this is our tale,

They are all around us
and interesting for sure.

It's more likely you know us
as the slug or the snail.

On one big foot we move
on the land and by sea,

And one thing's for sure - we're very slimy!

SNAIL — is the common name for gastropod mollusks that have shells and are found everywhere in the world—living on land and in fresh and salt waters. There are over 43,000 species of snails. Some additional amazing facts about snails include:

- Snails can only crawl. Even those that live in water can't swim. As they crawl they secrete a slime to act as a lubricant and an adhesive that helps them move across surfaces and even upside down. Snails travel at speeds that vary from slow (47 meters (154 feet) per hour) to very slow (10 meters (33 feet) per hour); making the snail one of the slowest creatures on Earth.
- Depending on the species, snails can live 5 - 25 years.
- Most snail species have a ribbon-like tongue called a radula that contains thousands of microscopic teeth. The radula works like a file, ripping food up into tiny pieces. Their diet consists of leaves and stems of crops and flowers.

With fun facts too

*Turtles and Tortoises
are Tremendous* is sure
to delight every
young reader!

Turtles are tremendous and
tortoises are terrific,

From the land to the seas of the
Atlantic and Pacific.

There are more than 350
species of the two,

Tortoises refuse to swim,
but turtles definitely do.

Turtles - are the lovely cousins of tortoises. Fun things about turtles are:

1. Turtles are reptiles - they are cold-blooded.
2. They sit in the sun to warm up and they breath air.

Tortoises - a tortoise is a turtle, but a turtle is not a tortoise! Fun things about tortoises are:

1. Tortoises are reptiles - they are cold-blooded.
2. Tortoises cannot swim, but can hold their breath for a long time.
3. Tortoises are herbivores - they eat plants, fruit, grass, ferns, tree leaves.
